

With workers of PAME, for the general strike

Workers at School the USB express their full solidarity with the Greek workers fighting against the Troika that is strangling the people of Europe and bringing the workers to the war .

Ignorance, exploitation and repression is this life that we are imposing .

We hope a greater coordination between the class unions in the European Union, as well as workers of the school with FISE, as an appropriate response to this terrible situation.

Your fight is ours, we march together to recapture the freedom of all to give a future worth living for generations
